

**Coulomb Solutions Inc. (CSI) has appointed Michael Britt, a recognized leader in clean transportation, fleet electrification, and fleet maintenance, to its Advisory Board.**

**May 11, 2026, – Livermore, CA** – Coulomb Solutions Inc. (CSI) today announced the appointment of Michael Britt to its Advisory Board. Britt is widely respected for his 30-year career leading the transformation of UPS's trucking fleets and advancing the company's clean transportation strategy. Before retiring from UPS, he served as Director of Maintenance and Engineering for International Operations, where he introduced technologies including compressed natural gas (CNG) and hybrid systems and helped lead UPS's early adoption of electrification.

**Michael Britt – Joins CSI Advisory Board**

Since retiring from UPS, Britt has served in several advisory and board positions, helping companies and organizations speed the adoption of clean technology and zero-emission commercial vehicles. He previously served as chairman of CALSTART in Pasadena, California, and served on the Board of United Way of Orange County, California.

Today, Britt serves on the Board of Directors of Transportation Energy Partners (TEP) for Clean Cities, the Technical Advisory Group to the American Trucking Associations, and is a member of the Society of Automotive Engineers. He holds a B.S. in Automotive Technology and an M.B.A. in Management. He is also a 2017 recipient of the U.S. Department of Energy Lifetime Achievement Award and a retired U.S. Marine Corps First Sergeant.

“We’re thrilled to welcome Mike to our Advisory Board,” said David Mazaika, CEO of Coulomb Solutions Inc. “He brings deep experience, strong market insight, and proven leadership in the commercial EV industry. Mike has long been an innovator in commercial vehicles and fleet management, and his perspective will help CSI strengthen its position with fleet customers. His understanding of industry trends will be a valuable asset to our organization.”

“I’m honored to take on this role with CSI,” said Britt. “CSI has always been a leader in commercial vehicle electrification. The company is developing highly advanced and innovative technologies that can help fleets accelerate electrification very cost effectively. From 12V sodium-ion batteries, integrated vehicle electronics (PDU+) to transportable battery energy storage systems that address charging infrastructure constraints, these products will enable rapid adoption of electrification while reducing TCO for CSI’s fleet customers.”

#### **About Coulomb Solutions Inc. (CSI)**

CSI is the market leading provider of transportable Battery Energy Storage Systems (BESS), high-quality advanced battery systems for commercial electric vehicles, low voltage batteries and electrification components to the North American commercial vehicle market. The company’s mission is to electrify the world’s commercial vehicles and provide stationary power users with innovative zero emission solutions, powered by renewable energy, improving our global society.
