CSI Announces Availability of CATL's H01 Commercial Vehicle Battery Pack in North America

CATL's packs now on 300k commercial electric vehicles???

CSI, the North American Distributor of CATL's Battery Packs for commercial vehicles, Coulomb Solutions Inc. (CSI), was founded to provide high quality, proven components to the North American commercial electric vehicle market at wholesale prices to enable rapid adoption of electric drive systems in medium and heavy-duty trucks, buses, and other commercial vehicles. As its cornerstone, CSI is the authorized North American distributor of commercial vehicle batteries for CATL, the largest Li-Ion battery designer and manufacturer in the world. CATL's batteries currently power over 200,000 buses and trucks in daily operation in demanding environments and terrain with some of the largest commercial fleets.

CATL's battery packs are modular and easily integrated between or outside the frame rails of most commercial vehicles. They are available in a variety of modules that are typically assembled in capacities from 100-600kWh and voltages from 100-800VDC. The LFP modules are specifically designed for commercial vehicle applications requiring a 10+ year life in commercial truck, bus, van, and locomotive use. CATL batteries have a long cycle life typically achieving 4000+ cycles and a high full pack specific energy of 140-160Wh/kg which approaches most NMC packs. These packs are available with a standard 5 year, 240,000 mile warranty and extended warranties are available.

It's time to transform the US commercial EV market from one dependent on subsidies to one of commercial viability. For proven, high quality, commercial EV products at wholesale prices, contact CSI at sales@coulombsolutions.com

About Coulomb Solutions Inc. (CSI)

CSI was founded to provide high quality, proven components to the North American commercial electric vehicle market at wholesale prices. The company's goal is to enable rapid adoption of electric drive systems in medium and heavy-duty trucks, buses, and other commercial vehicles. As its cornerstone, CSI is the authorized North American distributor of commercial vehicle batteries for CATL, the largest Li-Ion battery designer and manufacturer in the world. CATL's batteries currently power over 200,000 buses and trucks in daily operation in demanding environments and terrain with some of the largest commercial fleets. CSI also has a line of highly proven accessory components for commercial electric vehicles including battery heating and cooling systems, electric air conditioning compressors, electric cab heaters, electric steering pumps, electric air compressors for braking, accessory inverters and onboard AC and fast DC Chargers.
