FOR IMMEDIATE RELEASE:
April 25, 2021 * Livermore, CA

Former UPS VP of Fleet Maintenance and Engineering, Scott Phillippi, joins Coulomb Solutions' Advisory Board

Coulomb Solutions Inc. (CSI) is honored to have the former UPS VP of Fleet Maintenance and Engineering, Scott Phillippi, join its Advisory Board. In his UPS role, Mr. Phillippi was responsible for directing UPS' vision for electrification, and for helping drive innovation in the environmental and energy management space. Additionally, his responsibilities included managing maintenance and engineering for all international operations and overseeing fleet sustainability issues globally for UPS.

"I am excited to continue feeding my passion to bring commercial electric vehicles into the mainstream fleet market space", shared Mr. Phillippi. "Coulomb Solutions was founded on the concept of bringing high-quality, low-cost EV batteries and accessory components to the North American medium, heavy-duty truck and bus fleet segments. I am looking forward to supporting their efforts while guiding fleet deployments towards more sustainable and environmentally friendly transportation solutions".

Mr. Phillippi began his career with UPS in 1988 as a fleet technician and worked his way up to hold several director positions. As Automotive Maintenance and Engineering Manager, Scott was responsible for working with chassis manufacturers and body builders to produce UPS delivery vehicles. This included the integration of alternative fuel and advanced technologies into the fleet and deployment of UPS global fleet telematics solutions. This role also provided ongoing technical support for maintenance and sustaining these vehicles through their life cycles.

Scott Phillippi is a graduate from Lincoln College of Technology and has also completed several business programs, including Harvard Business School and Goizueta Business School at Emory University. Mr. Phillippi is a member of the Society of Automotive Engineers (SAE) and has served on the board of directors for Calstart, Clean Cities Georgia and the Green Truck Association (NTEA). In 2019 he was named to Environmental Leader's "Environment & Energy Leader 100" list.

"We are honored to have one of the leaders in commercial vehicle deployments, having recently retired from one of the world's largest fleets, UPS, join our expanding Advisory Board." said David Mazaika, CSI CEO. "Scott Phillippi has been instrumental in fleet vehicle electrification in North America and brings a wealth of fleet operation knowledge and experience to our team."

About Coulomb Solutions Inc. (CSI)

CSI provides high quality, proven components to the North American commercial electric vehicle market at wholesale prices. The company's goal is to enable rapid adoption of electric drive systems in commercial trucks, buses, vans, locomotives and marine applications. As its cornerstone, CSI is the authorized North American distributor of commercial vehicle batteries for CATL, the largest Li-Ion battery designer and manufacturer in the world. CATL's batteries currently power over 270,000 buses and trucks in daily operation in demanding environments and terrain with some of the largest commercial fleets. CSI also has a line of highly proven accessory components for commercial electric vehicles including battery heating and cooling systems, electric air conditioning compressors, electric cab heaters, electric steering pumps, electric air compressors for braking, accessory inverters and onboard AC and fast DC Chargers. See how CSI is enabling commercial vehicle electrification on our web site at www.coulombsolutions.com
